Designing my own Junk Rig already doneVon Karl AignerAs I am building a small sailingboat ( Adelle 14 ) which has as a possible sailplan also a junk rig and I was not happy with the designed form, I bought this book. I think it is perfect for an amateur boat builder to come to his own designed junk rig.I found everthing I needed and I managed to design the same sailarea ( 11 m2 ) but with a traditional sailform. I am very

happy with the book and catch myself opening it quite often to look for some detail that I still have to solve.
