SalviEs gibt Leute die sich eher an der Sprache/Stil interessiert sind als an den Inhalt eines Buches...Dann kauft ihr euch mal ein Buch von Goethe!...:-)Dieses Buch habe ich aber sehr gut gefunden. Schematisch und hilfreich um die verschiedenen Aspekte von Primefaces zusammenzufassen. Ich wrde es empfehlen.0 von 1 Kunden fanden die folgende Rezension hilfreich. Editor pleaseVon ianI suggest you download a Kindle sample first and see if you can deal with the very poor English in this book. I couldn't and returned the book immediately. And it's not just a matter of a few grammatical or spelling mistakes. Maybe if your native language is not English it won't bother you so much, but I doubt it.
