Von Zubin Wadia, Hazem Saleh, Allan Lykke Christensen : Pro JSF and HTML5: Building Rich Internet Components (Expert's Voice in Java) before purchasing it in order to gage whether or not it would be worth my time, and all praised Pro JSF and HTML5: Building Rich Internet Components (Expert's Voice in Java):

KundenrezensionenHilfreichste Kundenrezensionen2 von 2 Kunden fanden die folgende Rezension hilfreich. Solides Einfhrgung in JSFVon Weiser, CraigWer sich in JSF reinlesen will, ist mit diesem Buch gut bedient. Es bietet eine Einblick in JSF und Webanwendungen mit Java. Es ist gut aufgebaut und man bekommt Stck fr Stck mit wie JSF funktioniert.Eine Einfhrgung in HTML 5 ist es nicht aber der Umgang mit HTML5 und JSF wird gut vermittelt.Was mir gefehlt hat sind praktische bungen. Der Beispiel-Code kann man herunterladen und zum Laufen bringen (meistens... die Beispiele mit Datenbanken liefen nicht einwandfrei bei mir, aber das kann an mein mangelnde NetBeans-Kenntnisse liegen). Es wre effektiver, wenn ich ein bisschen Code selbst eintippen msste, oder sogar kleine

Aufgaben lösen müsste. Ich kann aber das Buch besten Gewissens weiter empfehlen.

Kurzbeschreibung Pro JSF and HTML5 shows you how to leverage the full potential of JavaServer Faces (JSF) and HTML5. This book is for Java developers who aspire to build sophisticated, enterprise-grade web experiences with HTML5-enabled JSF. Written by JSF experts and verified by established community figures, this book will serve as your primary resource, helping you build or integrate well-designed HTML5-enabled JSF components into your rich internet applications. Pro JSF and HTML5 starts by giving you a firm grounding in the design principles of component-based frameworks and the basics of JSF. It then details recent advancements in JSF 2.2 that make it friendlier, faster, and more productive than ever before. And it covers HTML5-enabled components, integration with JEE7 standards, 3rd party component libraries, security, and performance. The book concludes with a real-world application that puts everything you learned into practice. In this book you'll learn Foundational JSF topics such as the component life cycle, framework architecture, managed beans and CDI, expression language, conversion and validation, JSF events and view parameters. Leveraging new features in JSF 2.2 such as Faces Flow, Resource Library Contracts, and Ajax file uploading. Developing Advanced HTML5 enabled components in JSF 2.2. Creating JSF 2.2 applications that utilize Java EE 7 technologies (CDI, JPA 2.1 and EJB 3.2) for bean management, transaction management and persistence. Building advanced real-world JSF applications with considerations for security, performance, and usability. If you're a Java developer interested in the world of component-based frameworks, Pro JSF and HTML5 is for you. What you'll learn Foundational JSF topics such as the component life cycle, framework architecture, managed beans and CDI (Context and Dependency Injection), expression language, exception handling, conversion and validation, JSF events (faces events, phase events and system events), and view parameters. Utilizing new features in JSF 2.2 such as Faces Flow, Resource Library Contracts, and Ajax file uploading. Developing Advanced HTML5 enabled components in JSF 2.2. Developing PrimeFaces and RichFaces applications. Developing JSF 2.2 applications that utilize Java EE 7 technologies (CDI, JPA 2.1 and EJB 3.2) in order to facilitate bean management, transaction management and persistence. Unit testing JSF applications. Stateless JSF views. Implementing Security in JSF applications. Tuning the performance of JSF applications. Translating application requirements into a model and then implementing the model using JSF 2.2 and Java EE 7 technologies. Who this book is for This is a tutorial and reference is for both intermediate and experienced Java enterprise and web application developers. Who this book is for This is a tutorial and reference is for both intermediate and experienced Java enterprise and web application developers. ber den Autor und weitere Mitwirkende Zubin Wadia has seven years of experience in Java EE and .NET technologies. His experiences with enterprise content management, workflow, imaging, compression, and security allow him to appreciate a powerful framework that offers a high-degree of flexibility and efficiency. In 2005, Zubin designed and deployed an award-winning solution for a criminal justice agency in the government space, leveraging next-generation technologies such

as Ajax, Hibernate, Spring, BPEL, and, of course, MyFaces. His focus is on architecting an enterprise-wide contract management platform for the New York City Department of Health and Mental Hygiene. Zubin is chief technology officer at ImageWork Technologies, a leading government systems integrator on the East Coast.
