**Von William Lane Craig : Reasonable Faith (3rd edition): Christian Truth and Apologetics** before purchasing it in order to gage whether or not it would be worth my time, and all praised Reasonable Faith (3rd edition): Christian Truth and Apologetics:

KundenrezensionenHilfreichste Kundenrezensionen1 von 3 Kunden fanden die folgende Rezension hilfreich. Lazy reader bewareVon Beez on BooksThis wonderful look at the philosophy behind apoligetics is full of useful knowledge you can gleam. Beware though, this is not an easy read for lazy readers or readers with no background in

philosophy (like me). I managed to get through it but it took a lot of concentration and a dictionary. 0 von 0 Kunden fanden die folgende Rezension hilfreich. Great Book Von Peter Kirchweger It's a great book, that takes you deep in the philosophical background of Christian Apologetics. Dr. Craig gives not only good reason why to believe in the God of the Bible, but also digs deep what opponents of the Christian Faith say and tries to find the logical fallacies. But be aware, it is not very easy to read. 2 von 3 Kunden fanden die folgende Rezension hilfreich. Excellent for Christians, esp. historical considerations Von Aquinas The strengths of this book are: 1. its accessibility (it is easy to follow, and presented in a direct, style, Craig addresses the listener); 2. the historical approach for each topics (This is missing in most apologetics books. One can notice in particular how Craig masters the deist controversy, he did research on it); 3. its dealing with "existential" aspect of apologetics ("the human predicament"). The shortcomings are: 1. the absence of a global framework, reasoning for integrating the diverse arguments: one still need to study Geisler's Christian Apologetics for such an integration; 2. Craig's view of Christianity as basically true, his circular reasoning (based on the Bible) about the Holy Spirit, and his uncritical endorsement of Plantinga's nonsensical epistemology (see James Sennett's book ("Modality..."): this is the major shortcoming of the book, a big mistake. 3. The book is definitely intended to Christians (Craig tells how to convert non-Christians...), I would not lend to a non-Christian. Strangely, Craig addresses at the end of the album non-Christian listeners, asking them to make a commitment for Christ. But this may be a good thing for nominal Christians. 4. Craig's concentration on the Kalam argument: fine, this argument is excellent for those of us with a background in natural sciences, yet it does not give the theistic God (e. g. it could give several gods), just as the design argument. One really need to use Aquinas' 3rd way to get the full-blown theistic God (the latest exposition of it is in Yandell's "Philosophy of Religion", 1999, but this is a difficult read. An easier one can be found in Geisler's Christian Apologetics). The third way is based on abstract concepts (necessity, etc.) and is probably not fitting in a popular books, so I will not blame Craig for not using it here.

Kurzbeschreibung Perfect as a textbook yet excellent for lay readers, this updated edition builds a positive case for Christianity by applying the latest thought to core theological themes. J. Gresham Machen once said, "False ideas are the greatest obstacles to the reception of the gospel"-which makes apologetics that much more important. Wanting to engage not just academics and pastors but Christian laypeople and seekers, William Lane Craig has revised and updated key sections in this third edition of his classic text to reflect the latest work in astrophysics, philosophy, probability calculus, the arguments for the existence of God, and Reformed epistemology. His approach-that of positive apologetics-gives careful attention to crucial questions and concerns, including: the relationship of faith and reason, the existence of God, the problems of historical knowledge and miracles, the personal claims of Christ, and the historicity of the resurrection of Jesus. He shows that there is good reason to think Christianity is true. As Craig says, "If you have a sound and persuasive case for Christianity, you don't have to become an expert in comparative religions and Christian cults. A positive justification of the Christian faith automatically overwhelms all competing world views lacking an equally strong case."
