FASCINATING!!!Von Lilian RobertsRED MOON (Line Of Blood: The Seeker) was an amazing read. I am a fan of

Jack Goodwinds work and I found the story to be mesmerizing. I had a hard time putting the book down, as I wanted to know what I would find on the next page. I really do not want to give too much away because it is a short story but the situations were gripping and very exciting. It started from the very beginning when General Richardson was summoned to handle a very difficult situation at the US Air Force Space control center. The mission to the moon had me holding my breath because by now I had fallen in love with the three-crew members, Captain Finigan, Major Evans and Mark Teller. Their adventures after they landed on the dark side of the moon were absolutely mind-blowing. A few times I caught myself saying out loud, nonono wanting everything to turn out right. What they discovered and what they brought back is astonishing. While trying to recover from one mind-blow situation, I found myself facing a vampire!!!! OMG!!! I said to myself. Shockingly enough I was not the only one surprised by some of the events. Even professor Richard Hartmayer who had spent years studying the most unbelievable and disturbing myths of our history and a man not easily surprised, WAS surprised. Jack Goodwind has an amazing imagination and a perfect way in providing a book that will keep the readers glued to the pages. This is the first book in the line of blood and I cant wait for the next one. The cliffhanger on this one is great, and my curiosity is even greater. I want to know whats coming next. The author has done an awesome job with this book. It is a MUST Read and I would highly recommend it to anyone who loves SCI-FI, suspense, excitement and extraordinary thrill.

Kurzbeschreibung The Moon, our Moon. Something that has always moved mankind's imagination. Sometimes connected with divinity and mythology, even achievement as for the NASA missions, other times with curses and fear. Something that once again will bring mankind to a disconcerting discovery. For Major Joe Evans, life will never be the same. For the rest of us, the new threat will remain secret. Take the step...if you dare...
