Von Guy Podjarny : Responsive Fast: Implementing High-Performance Responsive Design before purchasing it in order to gage whether or not it would be worth my time, and all praised Responsive Fast: Implementing High-Performance Responsive Design:

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. Guter Einstieg, es fehlt aber an Tiefgang.Von SDWer sich das erste Mal mit Responsive Webdesign beschäftigt und dabei auf

das Thema Performance stt, ist es ein guter Einstieg in das Thema. Was man als Leser mit tieferem Hintergrundwissen im Bereich Webperformance nicht erwarten kann, ist ein tieferer Einstieg in die einzelnen Optimierungspunkte. Wie auch bei einem Heftchen von 56 Seiten.

Kurzbeschreibung Is Responsive Web Design (RWD) slowing your site down? It doesnt have to. With this concise book, youll learn practical techniques for improving performance with RWD, including a default set of guidelines you can use as an easy starting point. Web performance researcher and evangelist Guy Podjarny walks you through several existing solutions for dealing with RWD performance problems, and offers advice for choosing optimizations that will be most useful for your needs. RWD performance problems stem from excessive downloads of resources, including images, JavaScript and CSS, and HTML downloads designed to let your web application adapt to different screen sizes. Podjarny presents a series of increasingly larger-scope solutions to each issue, including client-side techniques and RESS (Responsive + Server Side Components). Address performance issues by starting with Podjarnys default guidelines Use a JavaScript image loader and an image transcoding service to create Responsive Images Reduce JavaScript and CSS downloads with asynchronous scripts, conditional loading, and multi-viewport CSS Prioritize resources to avoid excess content in RWD and defer the load of any content thats not critical Explore server-side Adaptive Delivery and RESS solutions as an alternative to pure RWD Guy Podjarny, or Guypo for short, is the Chief Technology Officer (CTO) of Akamais Web Experience business unit.
